

Entertainer

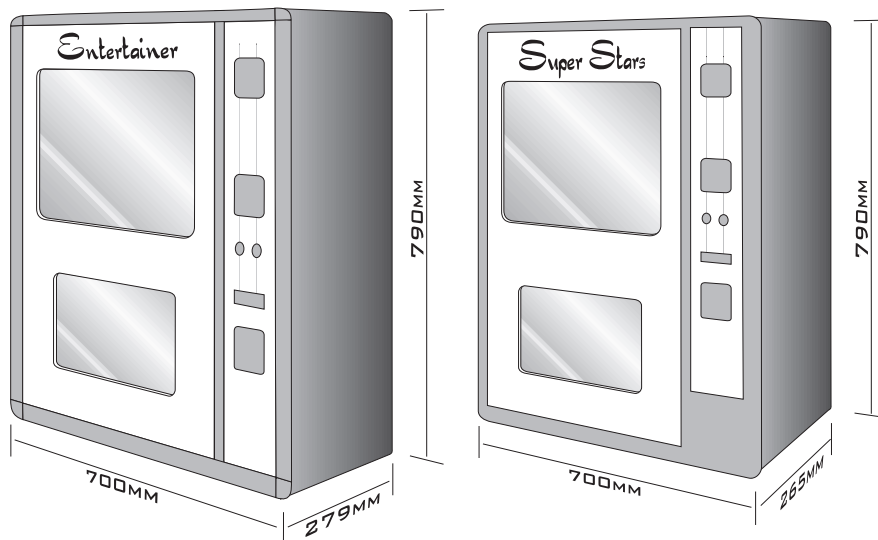

Super Stars

Both models available with external opening cash box door

Sound Leisure's 2160 range consists of the SuperStars 2160 and the Entertainer 2160. The SuperStars 2160 has established itself as one of the most successful wall mounted jukeboxes of all time. The front door is finished in an impressive wood veneer and the fully enclosed dust free CD mechanism is displayed in the lower glass. The entertainer is a new edition to the 2160 range. Finished with a brass anodised frame and incorporating the popular star burst illumination which gives a continuous display of moving lights across the front of the machine (as used in the award winning Starlite and Limelite range).

Both jukeboxes feature the 21st century mechanism (the simplest commercial CD mechanism in the world) and are the most compact 60 disc wall mount jukeboxes on the market, making these attractive models first choice for sites requiring an attractive compact jukebox.

Approx weight: 52 kilos

System Features

- 21st Century 60 disc mechanism (the simplest in the world) housed in its own dust free enclosure within the machine.
- CD playing surface remains untouched by selection and playing mechanism.
- Full view mechanism. (Can be hidden behind decorative glass if required).
- 24hr clock offering timed background music and random play.
- Disc popularity and fault diagnostics via keyboard.
- High security electronic cash meter.
- Twin channel amplifier. Mic. Input, Aux. Input, Aux. Output. (Spare position for extra twin channel amp if required).
- Interfaces directly with up to 3 matching wallboxes in the Sound Leisure range.
- Track lockout facility.
- Fault diagnostics for mechanism (self test).
- Optional external opening cash box.
- Stand available (as shown on SuperStars over).
