

soundleisure : The Complete Digital Solution

digitracks II

\* shown with optional MIM technology

# digitracks II

## digital wall-mounted jukebox

When the original Digitracks was launched in August 2004 it quickly became one of Sound Leisure's most popular jukebox systems. Aimed at outlets with modern decor, it's styling was designed to appeal to a younger crowd.

Originally benefiting from Sound Surfer technology the Digitracks can be seen in outlets worldwide. Since its introduction Sound Leisure's technology has advanced beyond comprehension and now for the first time the Digitracks II is also available with optional 'Milestones in Music' Technology!

To compliment the MIM option the Digitracks II has been upgraded to our tried and tested 19" touch screen interface, regarded as the simplest available on the market. The whole touch screen fascia is protected by Sound Leisure's "screen seal" system, a polycarbonate layer that safeguards against scratches, dust and other forms of pollution and vandalism.

In addition to the larger screen size the Digitracks II also benefits from Sound Leisure's 4 channel Amplifier allowing 4 sound zones to be controlled separately.

### FEATURES:

- 19" TFT display.
- Simple to use touch-screen interface for customers/engineers.
- The very latest chart and pre-release titles to attract maximum plays - Downloaded via CD Rom or online delivery.
